

Pandora Technologies Limited

Radar Speed Sign Dual Colour Display

EV 12

Key Features

- High brightness LED technology
- 18 Ah onboard battery as standard
- Compact sign with 12" digits
- Dual colour amber/red display
- Data-logging as standard
- Bluetooth as standard
- 100 metres range
- Optional battery or solar operation
- Lightweight design
- Comprehensive support

The cost effective tool for improving road and site safety

EV 12 vehicle activated, radar speed sign with dual colour display and reflective front

Health and safety is now a primary concern for anybody operating sites where vehicles are in use. Traditional, fixed signs can be easily ignored and ensuring that vehicles keep to the prescribed limit can present a difficult task.

The large digit display makes it plain for the driver and all around, to see that the speed limit has been exceeded or otherwise, the psychological impact is that drivers tend to reduce their speed to keep within the prescribed limits.

Customer observation suggests that each of our signs has an instant effect on this problem by providing drivers with visual feedback, should they break the speed limit, both on a site or on the roadside.

Our radar speed signs are user configurable and are provided with easy to use software tools to perform these operations. What's more is that the EV 12 has built in data-logging and bluetooth as standard.

Furthermore, we are an ISO 9001 (2015) registered company, established in 1984.

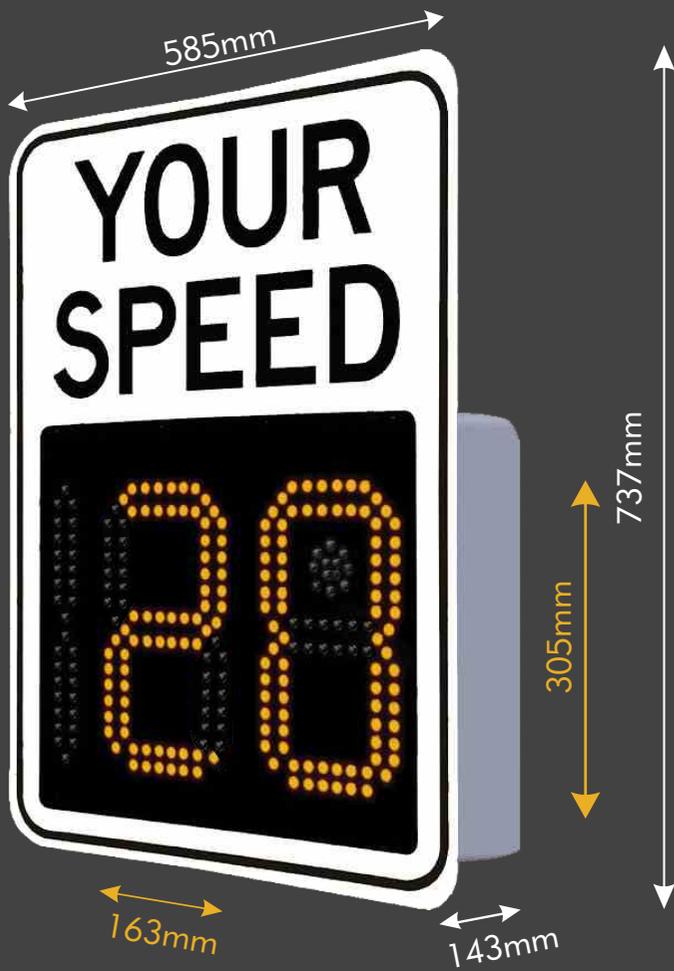

SPECIFICATION

Display Dimensions

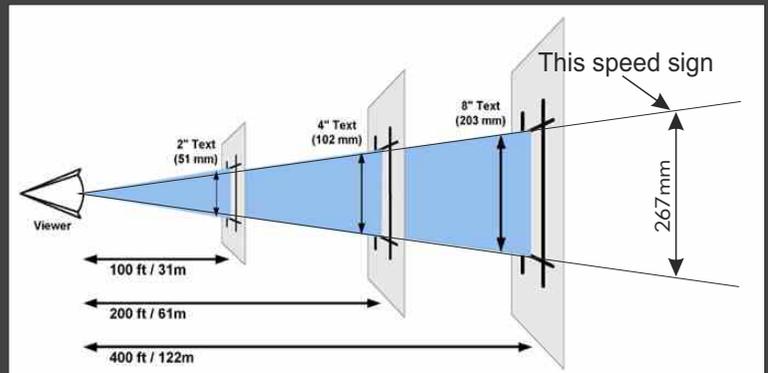

Feature

Specifications

Digit Size	163 x 305mm
Weight	9 Kgs (not including battery)
Faceplate	High-intensity, prismatic, reflective finish.
Communications	Bluetooth
Internal Radar	Doppler (FCC approved)
LEDs	Wide viewing angle
Construction	Lightweight polymer. Matt black front to reduce glare and maximise contrast around LEDs.
Weatherproof	IP65 compliant.
